Preparing Your Home

Put things within reach.

- Household items**
 - Put household items that you may need within reach. Bring items from upper cabinets down and items from lower cabinets up.

- Sleeping**
 - If possible, arrange to have your meals, bed and bathroom on one level. Keep extra clothes and towels on the first floor if you don't have a bedroom or a bathroom close by.

- Meals**
 - Prepare and freeze meals in small portions for reheating.

- Temperature**
 - Have a thermometer handy.

- Telephone**
 - If possible, keep a cordless phone or mobile phone in a basket attached to your walker or in a pocket or very light fanny pack. You want to be able to answer the phone without having to get up.

- Sitting**
 - Adjust the height of your furniture for your safety and comfort. When you sit, your knees should be lower than your hips. Remember posture is very important.
